

WHAT IS ECG?

**ELECTROCARDIOGRAM
(ECG) MEASURES
HEART RATE**

WE ARE INTERESTED IN ECG TO LOOK AT
HOW PEOPLE REACT IN DIFFERENT
SITUATIONS WHILE EXPERIENCING DIFFERENT
EMOTIONS.

ECG INVOLVES PLACING ELECTRODES ON THE
CHEST WITH ADHESIVE TO “LISTEN” TO THE
HEART.

THE ECG ELECTRODES ARE VERY SAFE TO
WEAR AND DO NOT SEND ANYTHING INTO
THE BODY.

SOMETIMES THE ADHESIVE WE USE TO STICK
THE ELECTRODES TO THE SKIN WILL CAUSE
SOME MILD SKIN ITCHINESS OR REDNESS.
REMOVING ELECTRODES CAN CAUSE MINOR
DISCOMFORT, THOUGH THIS IS TYPICALLY
LESS PAINFUL THAN REMOVING A BAND-AID.
